

Air Ankle Stirrup

Product Overview

The stirrups feature two adjustable air bladders and low-profile design that can be worn in shoes. Easy-to-use hook and loop closures ensure a quick and hassle-free application.

Features and Benefits

- Inflatable air bladders provide a comfortable fit and actively reduce edema.
- Hook and loop closures allow for quick and convenient clinical application.
- Bilateral shells provide rigid support, allowing dorsal and plantar flexion while controlling inversion/eversion.

Clinical Applications:

- Acute Ankle Sprains
- Post-Operative Support
- Ankle Injury Rehabilitation
- Chronic Ankle Instability
- Prophylactic Use
