

# Alcohol Prep Pads

Sterile Wipe | Fast-Acting Disinfectant | Single-Use Convenience

## Product Overview

These sterile alcohol prep pads are individually wrapped and saturated with 70% isopropyl alcohol to ensure fast, effective skin disinfection before medical procedures. Designed for injections, IV insertions, and blood draws, the pads are made from non-woven fabric and meet USP standards. Their compact size makes them ideal for hospitals, clinics, and mobile care environments.

## Features and Benefits

- Sterile & Individually Wrapped: Ensures hygiene and single-use protection.
- Quick Disinfection: Alcohol formula disinfects skin in seconds.
- USP Compliant: Meets recognized quality and performance standards.
- Portable & Easy to Use: Compact and convenient for any care setting.
- Cost-Effective Solution: Ideal for hospitals, clinics, and medical kits.
