

Standard Aluminum Crutches

Height Adjustable | Push-Button Design | Heavy-Duty Stability

Product Overview

Medzah's Standard Aluminum Crutches are built to reduce strain during recovery from injury or surgery. Made from reinforced aluminum, these crutches feature push-button height adjustment, non-slip rubber tips, and a robust design to deliver secure, all-day support across multiple user sizes.

Features and Benefits

- Strong aluminum construction supports users up to 400 lbs.
- Push-button adjustability allows quick and secure height customization.
- Internal riveted tubing offers superior durability over plastic connectors.
- Nonslip rubber tips enhance traction on various surfaces.

Product Specifications

- Material: Aluminum
- Weight Capacity: 400 lbs
- Adjustment Mechanism: Push-button system
- Center Tube: Double-extruded for added strength
- Foot Piece: Internal riveted design for improved load stability
- Tip Type: Nonskid rubber
- Wear Guard: Built-in metal ring to reduce long-term friction
- Assembly: Pre-assembled, ready to use
