

# Elbow Splints

Introducing our precision-engineered elbow support—a cutting-edge solution for swift recovery and enhanced mobility. This innovative immobilization device is expertly crafted to safeguard IV sites while allowing complete freedom of movement. Made with premium nylon-laminated foam and reinforced by robust aluminum supports, it ensures superior durability and comfort. The design is completed with intuitive hook-and-loop closures for effortless application and removal, providing both ease of use and reliable performance. Elevate your recovery experience with a product that combines protection, comfort, and flexibility.

## Features and Benefits

- Elbow immobilization solution designed to protect IV sites on the arm.
- Allows unrestricted arm movement while ensuring site safety.
- Made from nylon-laminated foam for comfort.
- Reinforced with durable aluminum supports for stability.
- Easy-to-use hook-and-loop tab closures for quick application and removal.
